synchronia

by alfonsofonso

"The only way to understand synchronicity is experiencing it" - Anonymous

Synchronia is a music and visual performance inspired by science fiction and a danzable and very melodic sound.

The visuals are created with javaScript and consist in a web page projected directly into the performer so his movements, the music and the visuals are in sync.

The artistic intentions and the narrative of the piece explores the human longing to connect with alien species via the music language.

There are three concert formats:

1. Synchronia - The Experience
The audiovisual live show with musicians and electronic databases.
Jazz style songs, latin, pop and house.
With a duration that can range from one to two hours.

Technical Ryder:
3 microphones for voice and percussion.
2 output jack for amplified instruments (guitar, bass)
2 1 stereo output jacks for computer
VGA video output for projector
table: at least 60x30cm

2. Synchronia - DJ Live Set

Intended for small stages or reduced Djs cabins version without musicians (maybe a singer or a wind instrument) and it's more dance-oriented with a "club" atmosphere. Variable duration.

Technical Ryder:
2 Audio Output Jacks
Video Output VGA (optional)
table 60x30cm

3. Synchronia Songs - DayLight concert.

Daytime version concerts, to perform the songs with a softer tone without projections.

Technical Ryder:
2 voice microphones.
1 stereo output for 2 Jacks for the audio mixer and computer.
table: 60x30cm
